

SUSTAINABILITY EFFORTS

A LEED Silver Certified Facility

Well done is better than well said.

– Benjamin Franklin

...now take a look at
what we've done.

WATER

- Water efficient low-flow plumbing fixtures, achieving a 32% reduction in total water usage

ENERGY & ATMOSPHERE

- Facility designed using Whole-Building Energy Simulation Modeling resulting in 23.64% savings in energy cost
- Energy efficient HVAC equipment
- LED lighting throughout the building

MATERIALS & RESOURCES

- 20% use of regionally-sourced building materials
- Storage and collection of recyclables – projected yearly volumes: cardboard 175,000 lbs, compost 8,000 lbs, pallets 1,000 lbs.
- 83% use of Forest Stewardship Council certified wood
- 26% use of recycled building materials
- Diverted 85% of construction waste from landfills to be recycled

INDOOR ENVIRONMENT QUALITY

- 100% of indoor spaces have controllable lighting via occupancy sensors
- Use of low-emitting materials during construction e.g. adhesives, construction materials, etc. low in VOCs

LEVY RESTAURANTS CATERING SERVICES

- Food waste awareness program
- Kitchen organic materials are composted
- Leftover food is donated to The Healing Place
- All disposable ware is environmentally friendly
- Eco-friendly straws are used in place of plastic

SUSTAINABILITY PARTNERSHIPS

- Louisville Water Company's partnership provides 25 water bottle filling stations throughout the facility
